Terms and Conditions - Commercial Lighting Incentives

Program Offer: The Program covers products purchased and/or services rendered on or after **January 1, 2016**.

Program Requirements:

1. Compact Fluorescent lamp and fixtures must be ENERGY STAR® qualified products and listed on the ENERGY STAR® website.
2. LED lamps and fixtures must be either ENERGY STAR or DesignLights Consortium qualified products and listed on their respective websites.
3. LED fixtures include hard-wired fixtures and recessed cans without screw-in adapter assemblies.
4. High bay fluorescent T8/T5 fixtures must be new fixtures with electronic ballasts and mounted at a minimum of 15 feet (distance from floor to lamp surface).
5. Fluorescent troffer fixture retrofits must include the replacement of four foot T12 or T8 lamps with CEE qualified High Performance/Reduced Wattage T8 lamps or DLC rated LED lamps. If installing T8 lamps, the fixture must have an electronic ballast (if not, the retrofit must also include a new electronic ballast).
6. High Performance T8 systems use 32 Watt lamps and Reduced Wattage T8 systems use 28 or 25 Watt lamps.
7. LED replacements for fluorescent lamps must be DLC rated and the type of fixtures being retrofitted must be identified. LED replacements must be a one for one replacement of the T12 or T8 lamps identified.
8. High Performance T8 and Reduced Wattage T8 lamps must be listed on the Consortium for Energy Efficiency's most recent Qualified Commercial Lighting Product List posted at: <http://library.cee1.org/content/commercial-lighting-qualifying-products-lists>.
9. Replacement and retrofitted fixtures must have a lower wattage than the original fixture.
10. A copy of sales invoice must be provided to the Utility. For retrofit applications, proof of purchase must be provided for the necessary number of lamps as indicated by the fixture type on the rebate form.
11. If applicant intends to install equipment at more than one location served by the Utility, separate forms must be completed for each location.
12. TOTAL REBATE SHALL NOT EXCEED 50% OF INSTALLED COSTS.
13. A MAXIMUM REBATE payment from the Utility may be applied to your rebate request. For projects where you expect the incentive to exceed \$5,000, you should contact the Utility for pre-approval prior to installing.
14. Custom rebates may be available for special applications and larger projects with pre-approval.
15. Outdoor fixtures must replace or install entire fixture with appropriate ballast (no lamp or bulb replacements).
16. Outdoor lighting must be on from dusk to dawn and controlled by an automatic photocell sensor (cannot be wired to a motion sensor or manual switch).
17. Outdoor lights and lighting used in non-heated buildings must have cold start ballast rated down to -20 deg. F.
18. Outdoor induction lights must be pre-approved by the Utility.
19. For livestock buildings and other areas where lighting may be exposed to a corrosive environment, use the following:
 - Dust and moisture tight nonmetallic fixtures with shatterproof, vapor tight globes.
 - Fixtures with corrosion-resistant materials and gasketed covers.
 - Fiberglass or aluminum enclosures and Lexan® covers. Don't use fixtures with ABS plastic or acrylic diffusers where chemicals and high pressure hot water cleaning and sanitizing systems are used.

ENERGY STAR Verification:

ENERGY STAR qualification can be verified by one of the following:

1. Provide cutout of package showing ENERGY STAR logo, product type and model.
2. Provide cutout of UPC symbol and model number from product package and a printout from the ENERGY STAR website confirming that model's qualification.
3. Provide model number of product and qualification will be determined by the Utility. ENERGY STAR listings can be found at: www.energystar.gov.

DesignLights Consortium (DLC) Qualification:

To determine if a product is qualified through the DesignLights Consortium, search the DLC Qualified Product List for the specific model number at www.designlights.org. Customer should provide a printout to the Utility showing their product from this listing.

General Terms and Conditions

The Utility must supply all electricity to the equipment for which the rebate is being paid.

Application Information: Missing or incorrect information on the application may delay processing and delivery of the rebate. An invoice is required and should include specific product information, including the brand, model, serial number and date of purchase of the energy efficient measures. Other information including manufacturer's equipment performance sheets may be required upon request.

The Utility reserves the right to verify sales transactions and to have reasonable access to the Customer's facility to inspect pre-existing equipment (if applicable) and energy efficient measures installed under this program.

Warranty Information: The Utility makes no warranties, expressed or implied, with respect to equipment operation, material, workmanship or manufacturing. The Utility does not guarantee that a certain level of energy or cost savings will result from the use of products covered by this program.

Limitation of Liability: The Utility's liability in connection with this program is limited to paying the rebate specified when all terms and conditions have been satisfied. Under no circumstances shall the Utility be liable for any consequential or incidental damages or tax liability resulting from participation in this program.

Participant Certification: Participating Customer certifies that he/she purchased and installed the equipment listed on their application at the defined location served by the Utility. The Customer agrees that all information provided is true and that he/she has conformed to all program requirements. If the equipment and application does not comply with the Utility's rules and qualifications, the rebate amount may be denied or adjusted.

Program Changes/Termination: The Utility reserves the right to extend, modify (including incentive levels) or terminate this Program at any time without prior or further notice. The Customer is responsible for checking with the Utility to determine whether the program has been changed or is still in effect.

Customers must apply for rebates within six (6) months of the purchase date (as shown on the Customer's invoice). Past eligibility, however, does not guarantee that equipment will meet criteria for current programs in effect.
